

## Pharmacoeconomics Practice Workshop

This workshop focuses on the practice of pharmacoeconomics in different settings and its implementation steps within different decision makers. The aim of this workshop is to illustrate the practical skills of conducting an economic evaluation to inform the decision makers and policy makers to improve the health of the Egyptian population.

### OBJECTIVES

- Understand the concept and the steps of the decision analysis.
- Differentiate between decision tree and Markov model in practical sessions.
- Calculate costs and outcomes of new interventions in two case studies.

### Venue:

National Hepatology and Tropical Medicine Research Institute

### Date:

May 15th, 2018
