

Certificate in Evidence Based Research

One of the basic skills in health economics and outcomes research is the ability to search and find relevant and robust evidence of similar studies in the scientific community. The ISPOR UAE Chapter is committed to support the development of research skills in the region and the UAE and is therefore looking forward to participating in and promoting the upcoming ***Certificate in Evidence Based Research***.

The certificate course will be presented by TCD Research in collaboration with the University of Pretoria. It consists of three modules, namely i) ***Certificate in Evidence Based Medicine*** ii) ***Certificate in Biostatistics and Clinical Trials***, and iii) ***Certificate in Systematic Review and Meta-Analysis***. The courses are structured around three activities, namely a pre-course assessment via an electronic learning platform, two days face-to-face training, and a post-course assessment via the electronic learning platform. While the two-day training will cover theory, it also focusses on problem-based learning methodologies where participants are continuously exposed to real world problems to use the theory learned in a practical way. A certificate will be issued for each module and for those who successfully complete the three modules, the ***Certificate in Evidence Based Research*** will be awarded. This will be a CPD accredited course.

The first module (***Certificate in Evidence Based Medicine***) is scheduled for 28 and 29 September 2019 in Dubai UAE. For more information please contact Dr. Ola Ghaleb AIAhdab, President of ISPOR UAE Chapter (DR_Ola@mohap.gov.ae) or tienie.stander@tcd-global.com
