Overview

PCORnet is designed to empower people to make informed health care decisions by enabling clinical research that is faster, easier, less costly and, most importantly, more relevant to their needs. PCORnet is a large, highly representative, national “network of networks” that collects data routinely gathered in a variety of health care settings, including hospitals, doctors’ offices, and community clinics. PCORnet operates as a learning health system that has implemented shared practices across nearly 80 health systems totaling over 13,000 individual hospitals and clinics.

PCORnet is more than a data network and offers many efficiencies to streamline research.

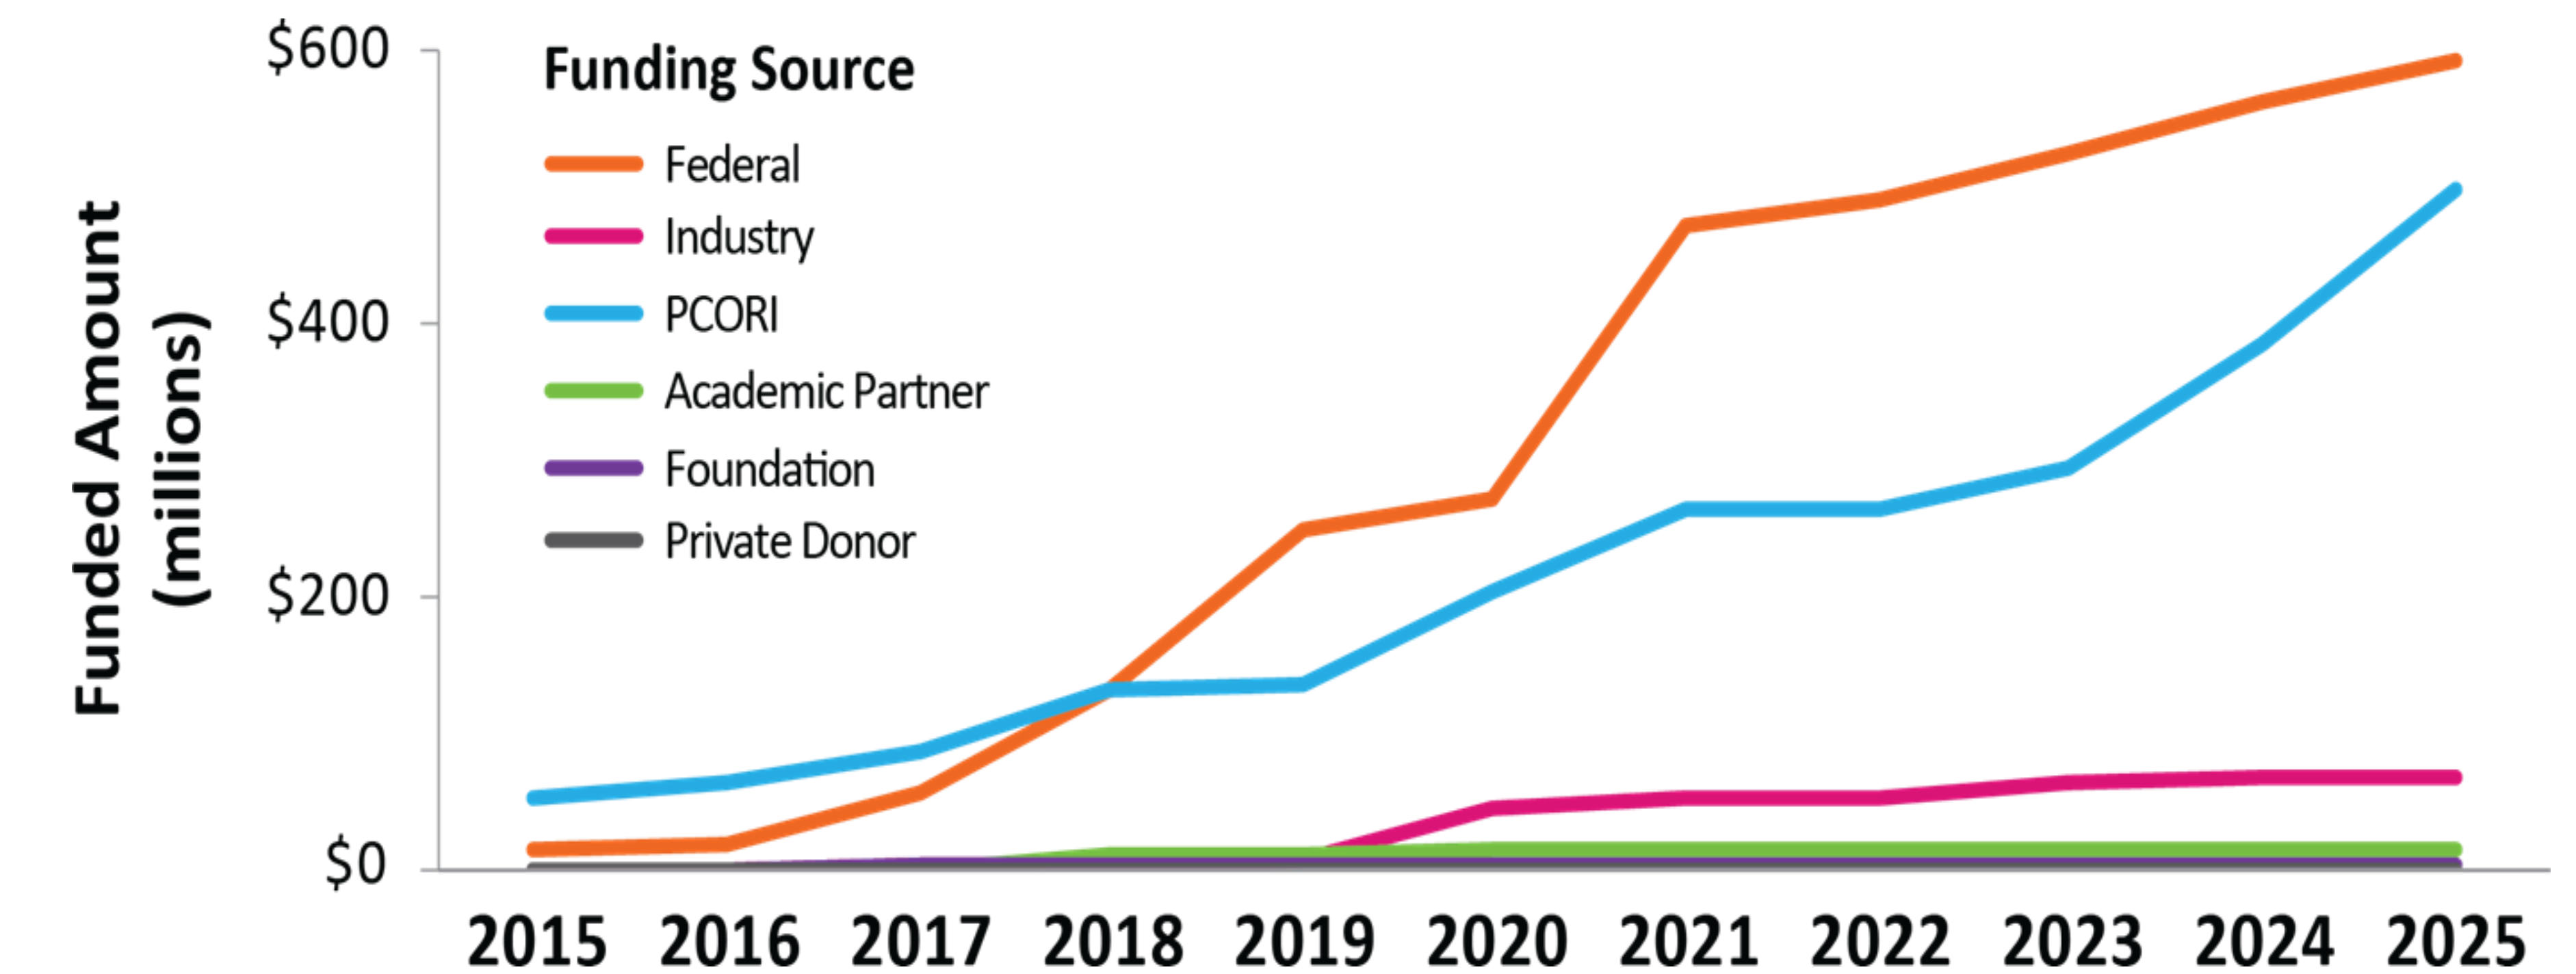

Research in PCORnet

PCORnet is a national resource, funded by PCORI, that enables insights from high-quality health data, patient partnerships, and research expertise to deliver fast, trustworthy answers that advance health outcomes.

Research Powered by PCORnet®

- Real-world evidence studies
- Comparative clinical effectiveness research
- Population health research
- Pragmatic research
- Health systems research
- Implementation science research
- And more

A Snapshot

50
States

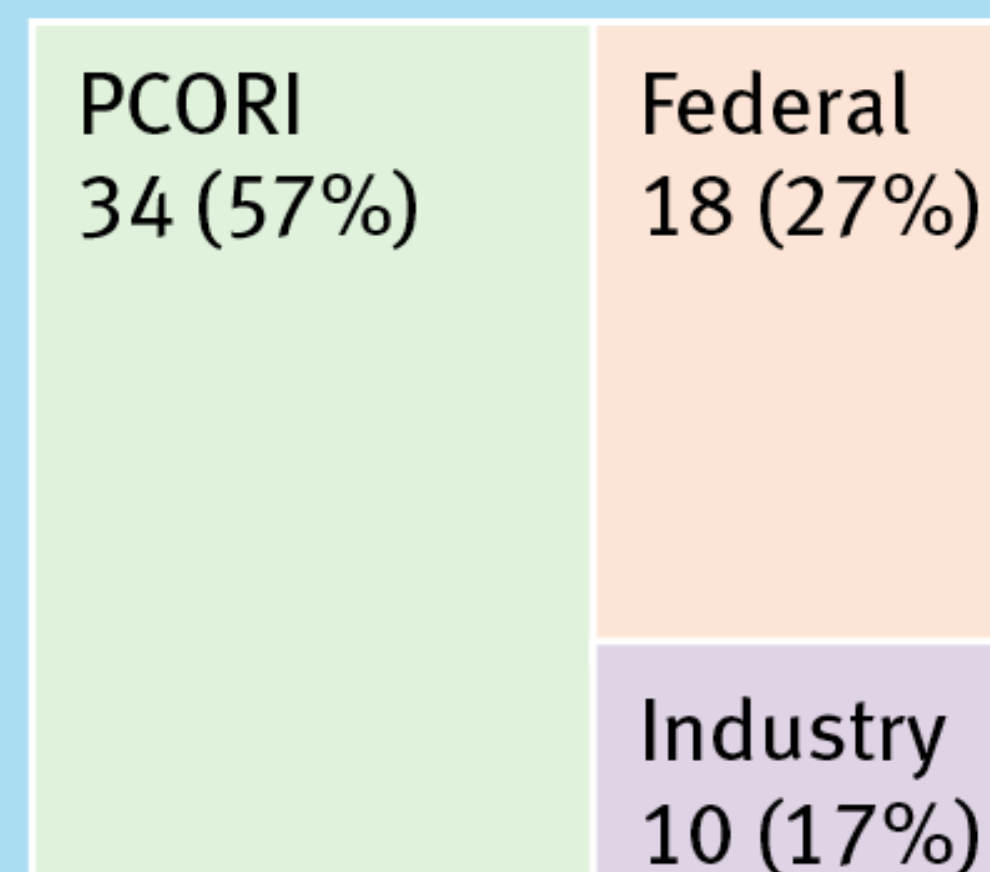

PCORnet is linked to patients in every state in the U.S.

47
Million People

PCORnet represents data from everyday healthcare encounters with >47 million people annually across the U.S.

62
PCORnet®
Studies

Funded by

78

PCORnet®
Network Partners

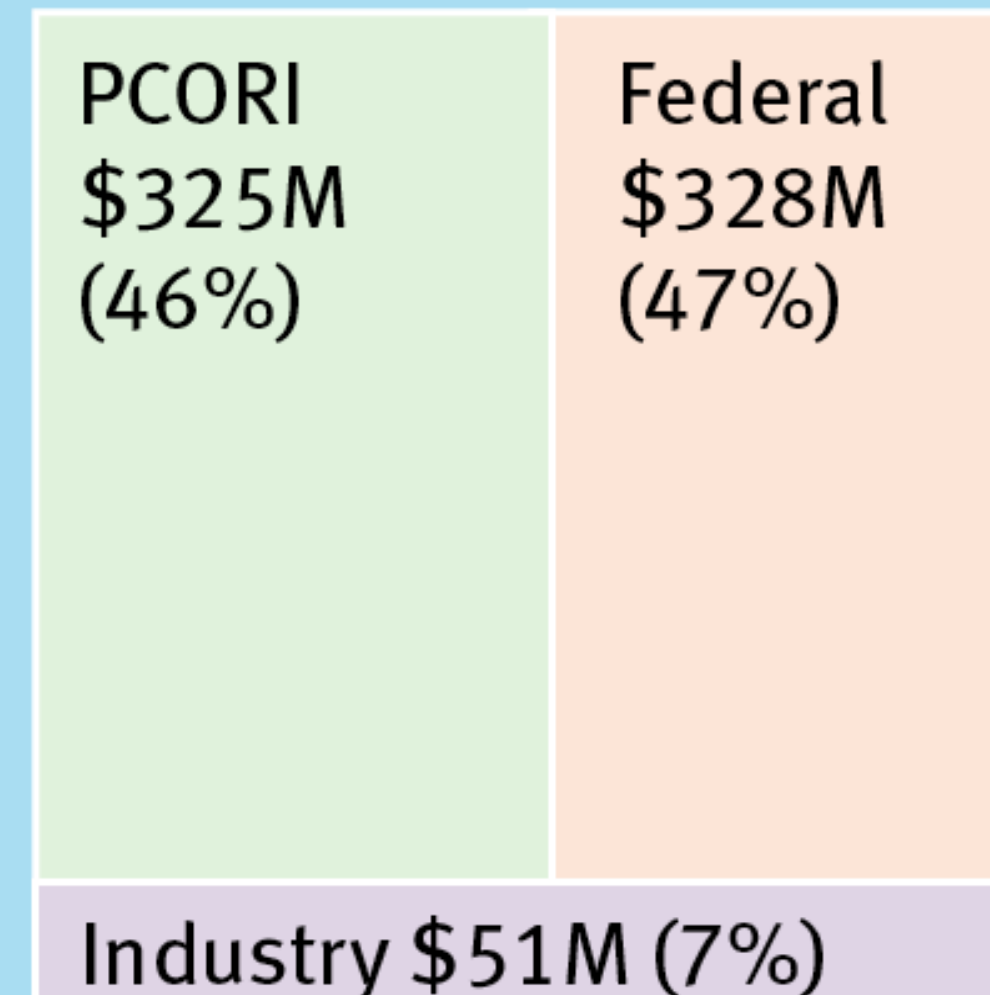

8 PCORnet® Clinical Research Networks across the U.S.

1,074

Key Efficiencies

- PCORnet® Common Data Model
- PCORnet Master Clinical Research Agreement
- PCORnet Master Data Sharing Agreement
- Dissemination Support
- Public Site Profiles
- PCORnet® Common Engagement Model
- Adherence to Single (SMART) IRB
- Data Flow Templates
- Policy Limiting Pre-Award Subcontracts
- Site Performance Reports
