INTRODUCTION

You may wish the start of the text, the section introduction and the conclusion to be numbered and modifications concerning the background/figure display are to be done at a Master Slide level.

OBJECTIVE

How to use this poster template... Simply replace this text and replace it by typing in your own text, or copy and paste your text from a Word document or a PowerPoint slide presentation. The body text must not exceed 20 points. Try to keep text left aligned, do not justify text.

METHOD

TIPS FOR MAKING A SUCCESSFUL POSTER...
 • Re-write your poster into poster format i.e., simply everything, avoid data overload.
 • Headings of more than 6 words should be in upper and lower case, not all capitals. Simplify the title.
 • Try not to write whole sentences in capitals or endline to stress your point, use bold characters instead.
 • When laying out your points, leave white space around your text. Don't overcrowd your poster.
 • Spell check and get someone else to proof-read.

RESULTS

Importing / inserting files... Images such as photographs, graphs, diagrams, tables, etc., can be added to the poster. Avoid large horizontal tables as they will be difficult to read. To insert images, go through the menu as follows: Insert / Picture / From File... Locate the file on your computer, select and press OK. Photos ensure all images have .png or JPEG/PDF, other formats may cause images to get corrupted after saving. Be aware of the image size you are importing.

Notes about graphs... For simple graphs use MS Excel, or create the graph directly in PowerPoint. Graphs created in a scientific plotting program (e.g., Sigma Plot, Prism, SPSS, Statistica) should be saved as JPEG or PDF.

The recommended font for captions is Calibri, not smaller than 12 pt. Left aligned if it refers to a figure on its left. Try to align the caption right at the top edge of the picture (graph or photo).

Poster Layout Suggestions

- Pay attention to your font size. Materials should be **easily read at a distance of 3ft.**
 - Recommended font types: Calibri, Arial, Times New Roman
- QR Codes are welcome as long as they are not commercial in nature.
- Posters made of heavy laminated materials usually take more than one person to set up and require lots of adhesive to hang. Please consider using lighter weight materials.

What's the Difference Between Poster Board Numbers and Acceptance Codes?

Poster Board numbers are assigned and printed by ISPOR. This number indicates where you should hang your poster during your session.

Presenters will receive their assigned poster board numbers approx. 1-2 weeks before the conference.

Poster board numbers are the SAME across all sessions.

Acceptance codes are assigned by ISPOR in your acceptance notification emails. Presenters are **required** to print their acceptance code on the top right corner of their poster.

Each acceptance code is **UNIQUE**. This helps attendees find your poster and abstract in the ISPOR Europe 2026 mobile app.

Shipping Your Poster

The presenter must organize any special shipping arrangements needed on their own. ISPOR will be unable to ship or store any material.

IF YOU ARE NOT USING POSTERSESSIONONLINE DO NOT SHIP YOUR POSTER TO THE AUSTRIA CENTER VIENNA. ISPOR is not responsible for any lost or misplaced posters shipped to the venue.

Printing Your Poster for ISPOR Europe 2026

There is **NO** onsite poster printing service at the Austria Center Vienna. For your convenience, ISPOR has secured special rates with PosterSessionOnline (PSO).
