Enclosure: ISPOR Chinese MDA-PE Chapter Annual Report 2014.

ISPOR Chinese MDA-PE Chapter Annual Report 2014

Activities/ Accomplishments	Summary
Scientific/ Educational Activities	<p>The chapter made some significant steps forward in education and training in 2014. We held 6 useful courses in Beijing, Anhui, Qinghai, etc., such as the training course of “Clinical Economic Evaluation and Medical Insurance Value Creation”, “Health Behavior Change and Rational Drug Use Management” to provide opportunities for health professionals to get continuing education credits that accredited on a national scale and help capacity building. Those courses also can train doctors and other relevant personnel in different clinical disciplines to disseminate the knowledge and skills of Pharmacoeconomics and Outcomes Research. About 300 people attended courses mainly including clinicians, pharmaceutical business workers and relative administrators.</p>
Policy-Related Activities	<p>The chapter has always been working hard to provide evidence and suggestion in essential drug policy , the third party payment model of health insurance , in order to help forward the establishment of national essential drug system, by conducting pharmaceutical evaluation research. We have been contributing our great efforts in the project of <i>Innovation of Disease Management System in Rural China</i> which is an important part of the <i>Health XI Project</i> since 2011. The disease management innovative solutions in rural China we proposed would contribute to the establishment of health insurance system for rural residents, improvement of health service system, and exploration of health system reform in rural areas of different development levels.</p> <p>We devoted major efforts to develop and implement drug formularies and standard treatment guidelines in rural area in China this year. The formularies and guidelines have been compiled and first put into use in Anhui province. We have been contributing our great efforts in deploying the practice nationally. This project would play a significant role in helping health sectors in rural area improve health service quality, provide critical public health service, control health expenditure.</p>
Conferences and/or Chapter Meetings	<p>Seminar of “Drug Formularies and Standard Treatment Guidelines for Rural Area”</p> <p>Seminar of “Application of Economic Evaluation in Essential Drug System and Health Insurance System”</p> <p>Seminar of “Clinical Practice Economic Evaluation”</p> <p>Seminar of “The Application of Pharmacoeconomic Evaluation Research in Clinical Practice”</p> <p>Seminar of “The Management Model of Rational Use of Drug in Rural Cooperative Medical Scheme in China”</p>

	Our monthly Chapter meeting is held on the first Tuesday of every month.
Membership Development	Members of Chinese MDA-PE Chapter include professionals and young researchers from universities and research institutes, clinicians in general hospitals, community service centers, and hospitals in rural areas, as well as those working in pharmaceutical business.
Other	We have established good cooperative relationship with the government, several organizations and companies in health sector. We have furthered our collaboration relationship with them by advancing the important part of the <i>Health XI Project</i> directed by MOH, doing Pharmacoeconomics evaluation with Analysis Group in USA , Peking University, and China Pharmaceutical University as well.
