

Russia Society for Pharmacoeconomics Research (RSPOR)- Summary Report 2006

The summary report of Russian Society for Pharmacoeconomics Research (RSPOR) activity, 2006

The Russian Society for Pharmacoeconomics Research (RSPOR) (Russian Chapter of ISPOR) is continuing to work in the field of implementation of pharmacoeconomics knowledge and principles in the public health services in 2006.

In the end of June 2006 RSPOR organized the seminar of the Formulary committee in Italy (Rimini) named "Medical technologies in the health care quality management system". During this seminar the problems of subsidiary drug supply program at the regional level, rational choice of medical technologies, the standards of medical care, the present moment and future of Russian drug's industry were discussed. It was the presentation of the second edition of Reference book of drugs of Formulary committee.

RSPOR has conducted the Russian forum during the IX-th annual European Congress of ISPOR (October, 2006) in Denmark (Copenhagen) named "Economic evaluation of drug supply at the regional level". It covered the problems of clinico-economical analysis in Russia, pharmacoeconomics of drugs included into the subsidiary drug supply program, pharmacoeconomics and health care quality management system at medical institutions, subsidiary drug supply program from the viewpoint of pharmaceutical industry.

In December 2006 third Russian Conference "The Health care quality management: licensing, standardization and pharmacoeconomics" was held. About five hundred people from 35 regions of Russia and participants from Kazakhstan, Israel, Great Britain and USA took part in the Conference. During the Conference training courses, plenary sessions, sections, round tables, open meetings of Formulary committee and Technical committee "Medical technologies" were held. There were devoted methodology and practical experience of clinico-economical analysis and standardization in the health care quality management system, licensing in health care, the National project "Health" realization, the economics' aspects of pharmacogenetics, health care quality management system at medical institutions, medical technologies in the practical activities of nurses.

As in the 2005, RSPOR and its Habarovsk branch organized the section of RSPOR in the context of Evidence based medicine congress (Habarovsk, September, 2006).

In 2006 the RSPOR members conducted the pharmacoeconomics analysis of several drugs in the field of pulmonology, hematology, allergology and cardiology.

RSPOR realizes information activity in electronic and printed mass media: website (www.rspor.ru), Journal «Health Care Standardization Problems», Newspaper "The news of Moscow therapeutic society – Moscow doctor".

In the 2006 was created the new brunch of RSPOR – Kazakhstan branch.

For the future RSPOR is planning activities in the field of regional policy and international cooperation, and also issuing and promoting of the information reference books on the problems of evidence based medicine and clinico-economical analysis.
